ABOUT US

• COMPANY PROFILE

Shanghai Shibang Storage Rack Co. , Ltd. is a professional one-stop shelf storage solutions provider, a integration company of research, produce and market, with the slogan "Good racks match good prices, support you and support yours". After many years of scientific research and update, Shibang Racking had gradually develop of manufacturing intelligent storage facilities.

Shibang is headquartered in Shanghai and branched in Nanjing, Chengdu, Fuzhou, Guangzhou, Nanning and Changshu. It has outlet in major cities across the country and enjoy one-by-one warehousing service. Shibang Racking co-brands are Fedex, Carrefour, Hilton hotel company, BMW Motor, Shanghai Mitsubishi, KFC and so on. Solid State Shelf has solved 600,000 households and enterprises storage problems.

•FACTORY STRENGTH

Advanced production equipment

Strict control of production technology

Excellent engineering quality control

DEVELOPMENT COURSE

SHIBANG BRAND 20 YEARS OF DEVELOPMENT PROCESS,
WITH ACHIEVEMENT, MILESTONES AND EVERY STEP OF GROWTH,
EACH OF RESULT IS INSEPARABLE BECAUSE OF EVERY USER´S TRUST AND SUPPORT.

1995

The company started from offline physical distribution at Shanghai. With shelf custom selling, birth an idea of business platform.

2009

Shibang decided Shanghai headquarters into Tmall by Shibang flagship store.

2013

Chengdu, Fuzhou and other branches were established, and with several of the world´s top 500 enterprises made strategic cooperation. By the implement brand strategy, open the prelude of Storage Shelf O2O sales mode.

2017

To become a professional warehousing solutions service provider, Guangzhou, Nanning and other branches were set up. According to business staff statistics, the annual sales got the first place at Chinese online shop platforms.

2018

Nanjing Intelligent Warehouse research and development (R&D) Center was established, with an annual output value of over 300 million RMB.

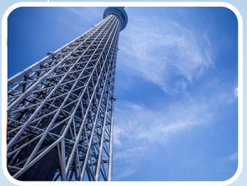

2019

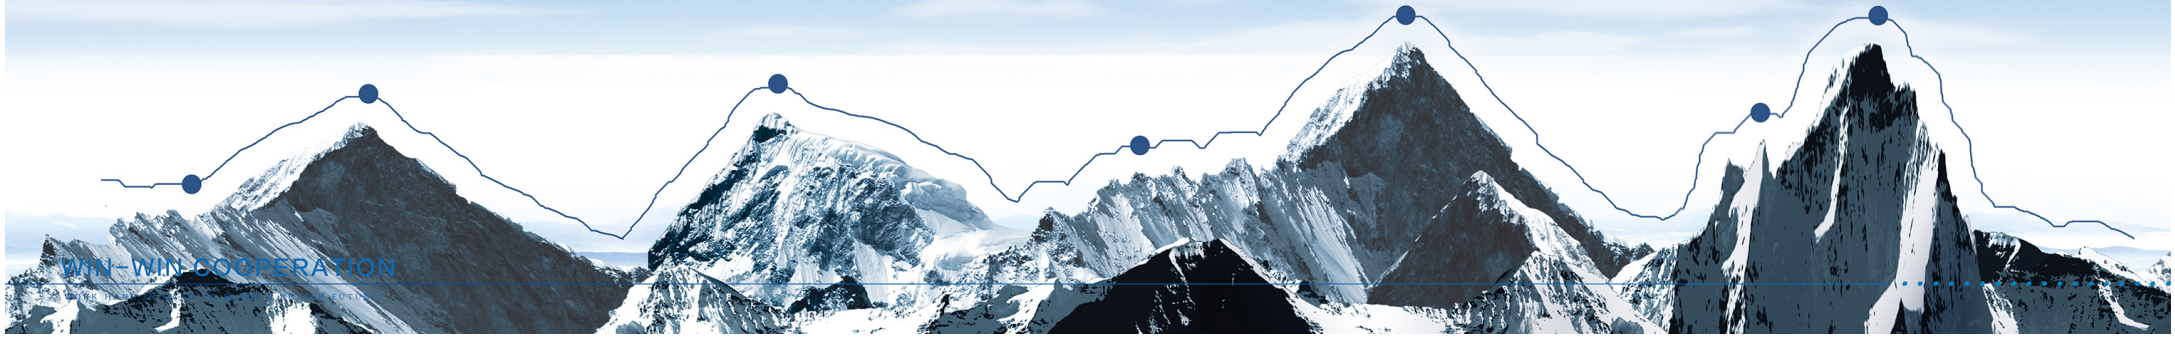

Shibang industrial park opened, Rose Wong endorsed the Shibang brand, which with the implementation of the group strategy

2021 and Future

The future to be continue.

WIN-WIN COOPERATION

QUALIFICATION HONOR

UNITY AND COOPERATION.
SHARING HONORS

Believe in the power of brands

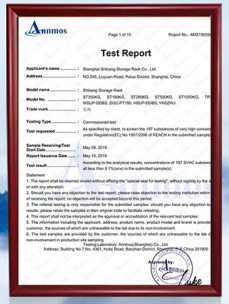

Product quality is cornerstone of the solid state shelf, service is source of develop of the solid state shelf,
the slogan "good racks match good prices, support you and support yours" will be radiate from country to the world.

SHIBANG CO-BRANDING

WITH MANY OF THE WORLD'S TOP 500, LISTED ENTERPRISES, NATIONAL ENTERPRISES WELL-KNOWN BRAND SUCCESSFUL COOPERATION FOR MANY YEARS

SHIBANG PRODUCTS

The quality is real and the service is perfect

Integration Program: SHIBANG BRAND PROFESSIONAL R & D, customization, production, design, installation and so on, to provide an integrated set of warehousing solutions.

All kinds of products: Shibang has more than 100 kinds of products, including adjustable storage shelves, pallet shelves, attic shelves, cloth shelves, supermarket shelves, household shelves, warehouse accessories, etc. .

Industry application: Shibang shelves are widely used in various enterprises, supermarkets, logistics centers, libraries, medicine, clothing and other industries.

Light Duty Storage Rack

PRODUCT INTRODUCTION

The light duty storage shelf is made up of three parts: column, beam and wire decks. The column is made of high quality ateel by cold rolling and forming.The beam is made of section steel, and the two ends are welded with hangers, which are used to connect the column. The wire deck is made of steel plate by pressing and welding, the following three or four stiffeners are welded, the height of the wire deck can be freely adjusted between 50 mm.

Medium duty Storage Shelf

PRODUCT INTRODUCTION

Medium duty shelves are mainly composed of columns, beams and wire decks. The main feature is bolt-free connection, suitable for manual storage and retrieval of goods. The carrying capacity is usually 200KG-400KG per layer. In order to facilitate the operator access to goods, the total height of the shelf is usually not more than 2 meters. But the shelf height can be up to 3 meters if it use of climbing equipment. Not can be used single, but free to splice multi shelves into variety of arrangements.

Raw materials

Parameter display of Medium Duty Storage Shelf

1 New Medium Duty Shelf

Load bearing	Lamination thickness	Column thickness	Beam thickness

Double color storage shelves

Double color storage shelf has these features of unique shape, reasonable structurenand strong loading capacity, which widely used in shopping malls, supermarkets, enterprise warehouses and other scenes.

SHELF CASE DEMONSTRATION

1. Double color storage shelf three-dimensional structure, can make use of warehouse room fully, improve warehouse capacity utilization and expand warehouse storage space.

2. Has variety of ways to storage and centralized management goods.
   With mechanical handling tools, also can make storage and handling work on right order.

Army green storage shelf

Characteristics:

1. Three-dimensional structure, can use warehouse space fully, improve the utilization rate of warehouse capacity.
2. Easy access to move goods, 100% selection capacity, inventory turnover smoothly.
3. Easy to invent, divide and other important management work.

Grid storage rack

CHARACTERISTICS:

1, Grid rack can make full use of warehouse space, improve the utilization rate of warehouse capacity.

2, Goods managed well with the shelf at a moment, and easy to inventory division, measurement and other manage work.

3, With mechanical handling tools, let large quantities of goods storage and manage well.

4, Grid shelf is suitable for the modern enterprise, which is low cost and high efficiency of the logistics supply chain management needs.

Heavy duty storage rack

PRODUCT INTRODUCTION

The heavy duty storage shelf adopts high-quality steel plate roll forming, not easy to move. Install is easy, all the shelf surfaces are processed with pickling, phosphating, electrostatic spraying, etc. With features of anti-corrosion and anti-rust. Applicable to all types of goods, and adjust layers height according to goods sizes.

Light Storage Rackcase presentation

PALLET SHELF CASE PRESENTATION

SCOPE OF APPLICATION

Widely used in manufacturing, third-party logistics and distribution centers.
For a variety of small or large batch goods.
This type of rack is usually used in high-level and ultra-high-level warehouses (automated warehouses) .

CHARACTERISTICS:

Adjust the layer easily to accommodate variable pallet heights.
Compatible with all kinds of equipment styles.
Conventional floor tolerances for racks is 10 meters high.
Be able to locate lower-level pallets on the floor (picking pallets).
Accessories available for every unit load type.
High average locations used - between 95 and 100 percent accessibility and stock rotation.

Selective pallet racking

PRODUCT INTRODUCTION

The simplest of all pallet rack storage systems, selective racking allows access to every pallet.
Providing adjustability and adaptability, storage density is low, with only 25–35 percent cubic space used.

CHARACTERISTICS:

Individual access to all pallets to full warehouse height, with the feature of simple stock rotation.
Easy to adjust the beam to accommodate variable pallet heights.
Compatibility with many handling equipment styles, which conventional floor tolerances to 10 meters high.
Able to locate lower-level pallets on the floor.
High average locations used – 95–100 percent accessibility and stock rotate well.

PALLET RACK
CASE PRESENTATION

Double deck deep pallet rack

PRODUCT INTRODUCTION

Modified reach trucks have the ability to stack two pallets deep in almost conventional aisle widths, with pallets stored in single-entry racks. Back-to-back racks are four pallets deep, reducing both the aisle-to-rack ratio and selectivity.
Forklift heights are limited to about nine meters by pallet load.
The upper levels usually have front-to-back rail guides and/or other visual let driver to locate the rear pallet.

CHARACTERISTICS:

Compared with selective racking, our storage density is enhanced because the rack-to-aisle ratio is increased.
50 percent immediated accessibility, with reasonable stock rotation.
Using well of all available locations - typically more than 90 percents warehouse space.
Safe and secure handling, with the bottom pallet usually use double deep-handling equipment.

High pallet rack

PRODUCT INTRODUCTION

Forklift trucks drive into lanes of racking that are specially built to support two outer edges of the pallet.
Stacking with 10 meters high and 4–10 meters deep, this system can provide very dense storage capacity that with lower access and rotation of products.
As the truck enters the racking, special precautions ensure elements of the racking are not damaged.
The design usually incorporates a stability structure at the rear of the rack, providing drive–in access from one side.

CHARACTERISTICS:

Product crushing prevented, with damage–free block storage.
Single or double–stacked pallets always accessible.
Low capital costs using conventional handling equipment.

ATTIC SHEIF
CANTILEVER RACK

Large gray attic shelves

CHARACTERISTICS:

Full-assembled structure, install easily.
The material section of column, beam and wire deck is optimized, the bearing capacity is strong.
The surface is treated by electrostatic powder coating, and the appearance is beautiful.
According to request, flexible design to suit two-storey and multi-storey loft.
Suitable for storing multi-variety goods, make full use of space.
The bottom shelf is suitable for material storage and floor support.

TABLE DISPLAY

This shelf supports the goods with the flat plate,
the pattern plate, the steel chrome plate and the wood plate type.
Attic shelf on the general use of light car or pallet car operation.

Warehouse climbing ladder

Characteristics:

1. The climbing car has advantages like stable structure, convenient movement and use safely. It can greatly improve the working efficiency and enlarge the operating space.

2. The climbing car is made of high-quality steel with high-quality casters for flexible movement.

3. When the height of the shelf exceeds the height of the human body, it is very inconvenient to take and place the goods on the height.

4. Surface coating and anticorrosion treatment. Climbing ladder is made of high-quality steel, which with after pickling, derusting, phosphating treatment, electrostatic powder spraying, paint and other processes.

Storage cage

PRODUCT INTRODUCTION

The storage cage has the advantages of fixed storage capacity, neat stacking, clear storage, easy inventory count and so on, and improves the effective utilization of storage space. In addition, the product is strong and durable, convenient
This product can be used not only in the factory workshop, but also in the supermarket as display promotion and storage, and can be used outdoors. Improved storage cages can be placed on shelves, assembly lines, or stacked: wheeled cages provide quick and easy turn-around in the workshop, and cages with PVC or iron plates prevent small pieces from leaking out.

Characteristics:

1. It is made of high-quality steel by cold rolling hardening welding, with high strength and large loading capacity.
2. Uniform specifications, fixed capacity, storage of goods immediately, easy inventory.
3. Galvanized surface, beautiful anti-oxidation, long service life.
4. Adopting International Standard, it can be used together with container, and effectively improve the utilization ratio of space.
5. Can Stack each other four high, to achieve three-dimensional storage.
6. Surface environmental protection treatment, hygiene immunity, turnover, storage and recycling do not pollute the environment.
7. With forklift, ground cattle, lifts, cranes and other equipment can be efficient operation.
8. Folding structure, low recovery cost, wood packing box is the alternative products.
9. Wheels can be installed at the bottom of the factory; the internal turnover is extremely convenient.

Plastic pallet

PRODUCT INTRODUCTION

The pallet is a kind of logistics unit which is used with the logistics equipment such as forklift and shelf. It can be used to store, load and move goods, and is one of the essential logistics equipment in modern logistics storage. The emergence of plastic pallets is the excellent product to meet the needs of environmental protection, and the use of plastic pallets instead of wooden pallets can reduce the damage to forests. It is an inevitable product to meet the development of the logistics industry, plastic pallets are widely used in chemical , textile and manufacturing industry for their high bearing capacity and long term service.

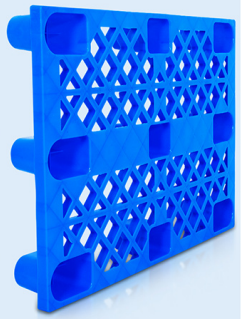

CHARACTERISTICS:

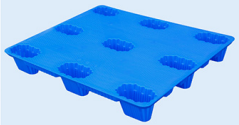

1. Four sides can be inserted, easy to operate.
2. Not suitable for stacking each other in warehouse, but suitable for use on various shelves.
3. Suitable for all types of truck transport, convenient materials containerization and transportation unit.
4. Convenient forklift, hydraulic pallet truck and other handling tools operations.
5. With non-slip rubber, ensure that materials in the process of handling and transportation without slipping.
6. Plastic pallets are safe, sanitary, moth-proof and need not to repair.

Logistics trolley

PRODUCT INTRODUCTION

Logistics trolley is also called truck trolley or cage car. is a four-casters installed with the mobile unit contain equipment.
Commonly used in large supermarkets logistics distribution or factory processes.
Logistics trolley is the logistics industry, can make the production line space on its operation.

Stacking frame

PRODUCT INTRODUCTION

Stacking rack can be stacked 3 to 4 layers on each other, forming a three-dimensional storage mode,
without the support of shelves, storage cages and pallets and other equipment.
It is suitable for rental old warehouse, workshop and other area where not suitable for investment shelves.

Product parameter display

Standard size	Upright Post	Bottom frame	Reinforcing bar
L120*W120*H150 (cm)	50*50*2.0	50*50*1.2	50*50*1.2

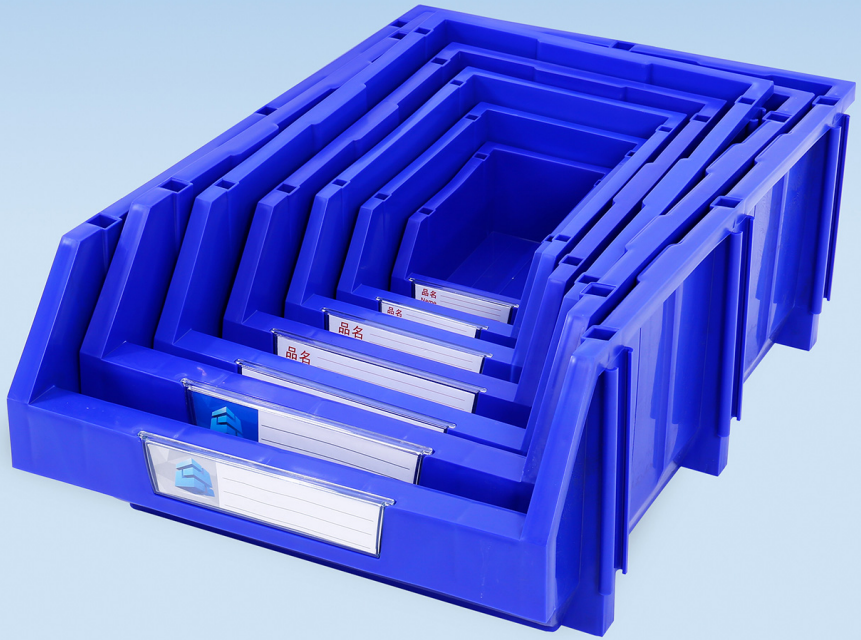

Characteristics

1. Convenient and reliable, can set together when out of use.
2. Help quantitive storage of goods to allocate and distribute, let goods storage and transport be convenient and fast.
3. The stacking rack can effectively protect the goods from damage during transportation, which make goods safe.

Turnover box

PRODUCT INTRODUCTION

Magnetic signage is your warehouse classification good helper. Identify product name, clear classification, improve the efficiency of product searching.

Shelf magnetic signage

PRODUCT INTRODUCTION

Magnetic label is a kind of label in modern warehouse management, also called magnetic label, magnetic label, material card, cargo card, made of ABS engineering plastics, the utility model relates to a material card which is magnetically adsorbed on a document shelf, a bookcase and a shelf to mark the information of the articles in the place, the front of which is the marked side of the information of the articles, and the back is a sheet square closed magnet. Commonly used in shopping malls, document rooms, libraries, warehouses and other places.

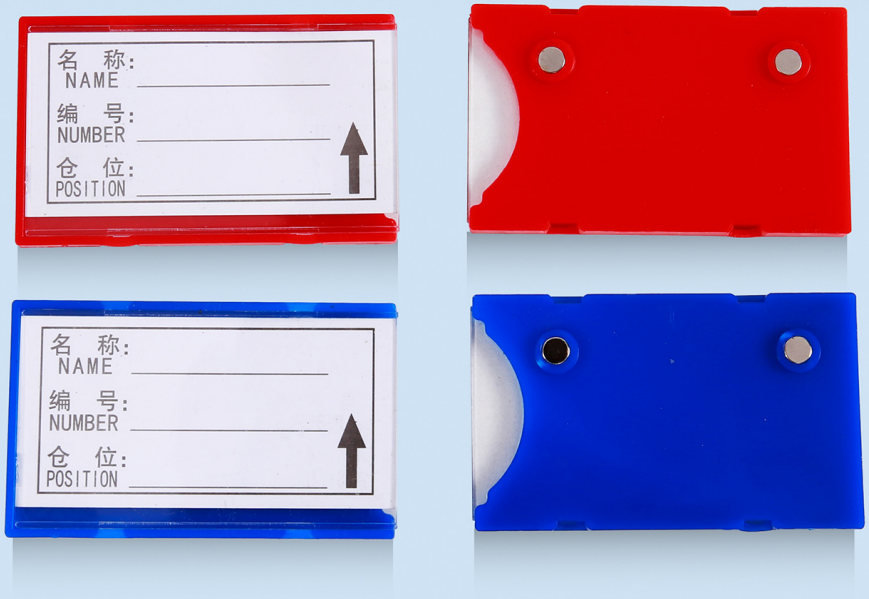

Product parameter display

Number	Product size	Material Quality	Color	Use scene
A4	300mm*215mm	ABS plastics+Magnets	Blue/yellow/black/red	Warehouse shelves Clothing Racks Stationery stores etc.
A5	215mm*155mm	ABS plastics+Magnets	Blue/yellow/black/red	
A6	158mm*110mm	ABS plastics+Magnets	Blue/yellow/black/red	

Strong magnetic label

PRODUCT INTRODUCTION

Magnetic label can be directly attached to book shelves, document shelves and warehouse racking.
Library management of information visualized, directly enhance the efficiency of management.
Its card information can be filled in according to the actual needs of users and can be replaced anytime.
It depends on magnetic surface adsorption, so the position can be changed convenient and fast.

Supermarket Shelf

Hole back board supermarket shelf

HOLE BACK BOARD SUPERMARKET SHELF CASE PRESENTATION

SCOPE OF APPLICATION

Supermarket shelf is a general term for all the shelves.
Common supermarket shelve modes are back-plate , back-net and back-hole supermarket shelves,
We also have dedicated supermarket shelves,
such as grain or oil shelves and washing shelves.
Supermarket shelves have a variety of styles, suitable for different occasions, such as retailing spermarket, convenience stores, pharmacy and so on.

Characteristics:

1. Modern design style, the supermarket shelve is single-sided that can be combined with each other.
2. Raising the base of supporting arm and increaseing the loading capacity, this shelf is also suitable for large-scale shopping mall.
3. The surface is treated by epoxy, which has variety of colors and with a strong anti-corrosion and rust-proof effect.

Angle steel racking

PRODUCT CHARACTERISTICS

The universal angle steel shelf is a kind of light-duty shelf. It is made of high quality cold rolled steel. It is easy to disassemble and adjust, can be combined flexibly, increase or decrease the number of layers to achieve the best storage effect.

CHARACTERISTICS:

1. Usually use for small or medium size, light goods storage, each layer can max loading 150kg goods.

2. Widely used in home living room, garage, office , mini working studio and so on.

3. Light duty shelves can also be installed on anti-static equipment, which are widely used in electronic enterprises.
